

Lancer Trade Out Master

Lancer understands that clean fresh beer sells best.

Regular line cleaning is a major factor in providing this to the customer. We also know that reducing beer waste is a major consideration for pubs and clubs.

The patented Lancer Trade Out Master is designed to minimize beer loss to encourage regular line cleaning. By ensuring beer is traded out, not thrown out, prior to a line clean the average hotel will find this system pays for itself within one year*.

Product Features

- Automatically commences trade out of beer lines prior to a scheduled clean
- Reduces beer wastage associated with line cleaning by selling the beer in the lines
- Records when beer line cleans are due and have occurred
- Provides optional gas pulse during line clean to assist the cleaning process
