

Modular Wine By The Glass

More business from modular wine serving units.

1 unit stand alone

2 consecutive units

The system can be positioned stand alone, mounted to the wall or can be completely built in a wall, kitchen or cabinet

PRODUCT FEATURES

- Climate control from 6 degrees up to 20 degrees (Fahrenheit 43 to 68).
- Preservation; by adding either argon or nitrogen gas (no taste, colour or smell).
- Presentation; by using the By The Glass® Modular, the inserted bottles are always presented in an elegant way
- Serving; with portion control (3 different doses), you always serve the exact desired pre-set amount of wine
- Easily expandable by linking multiple units by using only one plug (up to 6 units).
- Doors can be locked to avoid access. Available in different finishes.
- Serving buttons can be locked electronically
- Tubes which guide the wine are easy to change, so optimum hygiene.
- The inner LED lighting is dimmable in two positions.
- Also available with external water-cooling (optional).
