

The Chiller Plates

are efficient and compact devices that use solid-state technology to cool and stabilize beer temperatures, ensuring optimal conditions for dispensing. By effectively reducing beer wastage and maintaining the desired temperature, Chiller Plates contribute to the delivery of a perfect pint every time.

Features

The Chiller Plates feature 316 stainless steel product coils and a stainless outer case, ensuring durability and resistance to corrosion. Its compact design allows for easy installation in the space of a standard glass rack, and it can operate in any position without generating heat or noise under the bar. With its efficient cooling capabilities, the Chiller Plates significantly reduce beer wastage, minimize refrigeration gas usage, and lower installation costs. These versatile devices are suitable for both low and high demand outlets, consistently delivering the perfect pour every time.

Configuration

Dimensions	Width: 445 mm Depth: 160 mm Height: 465 mm
Weight	45.4kg
Beerline Circuits	5/16" OD 304 Grade Stainless Steel
Glycol Circuit	Manifold Internally Inlet and Outlet barbs 12mm OD (1/2")

Warranty
