

The **Siberian Elite Chiller**, a glycol unit brings exceptional performance and can be placed outside the cool room, giving you more space for your products.

Features

- Rotationally moulded inner and outer polyethylene tank offering long life and corrosion resistance
- Tank insulated with environmentally responsible, water blown non-CFC polyurethane insulation
- Airtight design of tank and lid, keeping condensation to a minimum to eliminate dilution of glycol solution
- Tank moulded legs allow for easy cleaning under the unit once installed.
- Easy installation and service
- Single phase power requirement (240V 50Hz) to operate both refrigeration and pump(s)
- IP56 Electrical connection
- Semi-submersible single-phase pumps- Single or dual pump options available

- 40L/min or 80L/min pump as standard. Other options available. POA.
- Manifolds complete with back check valves
- Glycol percentage check kit (refractometer)
