

The Central Unit has a display that is used to monitor and control a CO2 Safety System with up to twelve sensors. The central unit is multi-lingual, and it displays information text for all alarm and error conditions. It also displays the CO2 values of all connected CO2 sensors, indicating which sensor the value comes from. The central unit has an alarm memory that remembers and reactivates any alarm after a power interruption.

## Specifications:

Power supply:	12-24V DC
Power consumption:	40 mA
Communication:	RS485, Modbus
Acoustic signal-strength:	70 dB (1m) max.
Humidity:	0-90% non-condensing
Ambient temperature:	0 - 40°C
Dimensions (L x W x D):	90 x 161 x 38 mm
Ingress protection:	IP44
